

REMARKS

By the above amendments, the specification has been amended to correct clerical and typographical errors created during the translation of the Japanese version of the application.

Claims 1-6 have been amended and claims 7-11 have been added. The claims have been amended to remove multiple dependency and to render the claim language more in conformance with U.S. patent practice and idiomatic English. Applicants note that no new matter has been added to the claims. The amendments made herein have not been made to overcome the prior art, and thus, should be considered to have been made for a purpose unrelated to patentability, and no estoppel should be deemed to attach thereto.

If there should be any questions, the Examiner is invited to contact the undersigned at the telephone number listed below.

Respectfully submitted,
Tetsuo NAGANO et al.
